Amrita Solution:

Integrated Software Solution for Ayurvedic Treatment methods and Complete Hospital Administration

Solution:

- Patient Data access is via unique MRD number
- Extensive Clinical notes to help in better diagnosis and decision making
- Lab results are processed and delivered on time without any delay
- Patient Demographic and Clinical data security is assured with highly secured data center
- System provides multiple billing formats for OP, IP, Procedures etc all compliant with GST regulations
- Discharge Summaries are documented and delivered on time.

Benefits:

- Waiting time in reception, lab, nursing station etc. is avoided
- Accurate, reliable and authentic clinical data is documented with multiple level verification.
- Patient Data privacy is assured
- Effective billing system records are maintained.
- Improved end-to-end workflow efficiency results in significant cost savings
- Helps in CCIM compliance certification

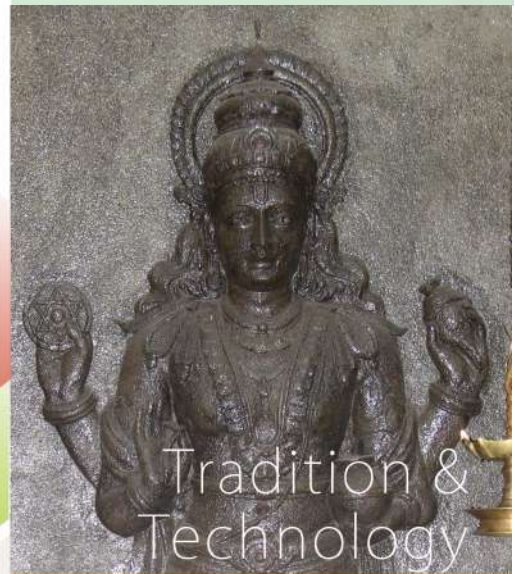

Amrita HIS Ayurveda Success Story

“Amrita HIS provides sufficient, accurate, understandable and timely information. HIS has quite significantly improved the quality of diagnosis by making information like Lab results, patient history readily available. Patient’s clinical data is accessible at any workstation in the hospital in a very user friendly framework. We have been successful in adapting this technology completely into an Ayurvedic perspective to become more effective and efficient in the practice of classical Indian Medicine.

Dr. Br. Sankara Chaitanya, Medical Director, Amrita School of Ayurveda and Hospital
